Mr. Barnard was traveling through the country selling clocks and sold a number in Beechwoods at the time Mr. Cooper bought this clock. PANTHER RUN MINES.

Well Equipped Modern Plant—Pardus is Name of the Mining Town.

One day last week a representative of THE STAR visited the Panther Run Coal Company plant at Pardus, which is located on the Peter Cox farm in Washington township, about three miles north of Reynoldsville and within a mile and a quarter of Sandy Valley. The plant was built last year by Ridgeway and New York City capitalists and is a substantial and modern coal plant. Henry Redding, superintendent of the mines, who resides at Reynoldsville, kindly escorted THE STAR representative over the plant.

The Panther Run Coal Co. began operating these new mines last September. There are two openings in the hillside, Nos. 1 and 2, with 2,200 acres of coal land lying back of these openings. The coal is hauled from mine to tipples by two electric locomotives. The large tipples are equipped with a Phillips' automatic dump. One hundred and fifty miners and ten coal cutting machines are employed in the mines and the shipment of coal is 500 tons daily. During the present year more men will be employed and the output of coal will be more than double the present daily shipment. The coal is of a good quality. The company has a branch railroad about one mile and a half in length, which connects with the P. R. R. near Sandy Valley.

The power house is 40 by 140 feet and is fire proof, being built of tiling and steel, with slate roof and brick floors. In this building there is one 325-horse power dynamo which furnishes power for the electric locomotives and lights for store, offices and other buildings, a large compressor with a capacity of twenty coal cutting machines, and four 150-horse power boilers, making a total of 600-horse power.

Pardus is a nice looking mining town of fifty-two company houses and a large company store. About fifty new houses will be erected there during the present year. The houses are all neat dwellings of five rooms each, excepting one large boarding house. They are set on stone foundations, well plastered and are not all painted the same color, as is usually the case in coal mining towns. The town has water works, the supply being pumped to a reservoir on the hillside from a well 125 feet deep, near the power house. There are fifteen hydrants for use of the citizens and five fire plugs. The town has a hose cart and 600 feet of hose to fight fire, if it is ever necessary.

The company store is 46 by 96 feet, two-stories high with a cement floor basement and cellar. It is a well planned building and has all the modern comforts, heated with steam, lighted with electricity, hot and cold water, bath room and closets. In rear of store is a large general office. On the second floor is Supt. Redding's office, Engineer Hirst's drafting room, two bed rooms, a clothing department and furniture department. The company did not only build their plant and town in a substantial, up-to-date manner, with the evident belief that cheapness is not economy, and with an eye to the comfort and contentment of men, but they have filled all the important positions with men of ability and geniality.

Henry Redding is superintendent, John C. Hirst chief engineer, W. F. Copp general bookkeeper, E. P. Newton pay roll bookkeeper, E. E. Logan general manager of the store and his assistants are E. R. Newton, A. J. Postlethwait and John S. Schultz, B. P. Mercer has charge of the meat market, Henry J. Haggerty is watchman and general all around man, A. W. Cable deliveryman.

James Flynn and J. Harvey are engineers on the electric locomotives, John and James Stewart are brakemen on the mining car trains, George Beatty is engineer at the power house, James Phillips weighmaster, W. A. Stewart check weighman, John and Robert Carlson blacksmiths.

John C. Hirst, of Reynoldsville, chief engineer of this company's different works, prospected and surveyed the Panther Run mines, made the plans for the plant and town and superintended the erection of the same. Mr. Hirst is an experienced man in his profession. Supt. Redding is postmaster at Pardus and E. R. Newton assistant postmaster.
